DETAILED ACTION

1. Claims 52-87 are pending. Claims 1-51 have been cancelled and claims 52- 67 are new claims in this communication filed 03/14/05 entered as Response After Non-Final Action and Request for Extension of Time. The IDS filed ~~03/20/03~~ ^{and 10/29/04} have been considered.

2. The objected to dependent claims 23, 33, and 43 containing allowable subject matter in the last Office action is hereby withdrawn in view of the new ground(s) of rejection as set forth here below.

Drawings

3. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the corrected drawings of figure 3, figure 7, and figure 8 submitted on 5/13/04 are considered informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 52 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: the preamble

Art Unit: 3624

references a system but the body of the claim does not have any hardware such as a processor to execute the components. Therefore, this is really no a system claim.

It is unclear in claims 52 and 65 whether the storage device is on a computer readable medium because the software is not operating on anything or tangibly embodied any place.

Claim 78 has a client coupled to a component but the software is not being tangibly embodied and doesn't require the client software to be any place tangible.

Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 52-87 are rejected under 35 U.S.C. 101 as non-statutory. The claimed invention is directed to non-statutory subject matter. The preamble references a system but the body of the claims refers to software. There is not any hardware or a processor to execute the components.

35 USC 101 requires that in order to be patentable the invention must be a "new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof"(emphasis added).

Allowable Subject Matter

7. Independent claims 52, 65, and 78 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph and 35 U.S.C. 101, set forth in this Office action. When the 35 U.S.C. 112, second paragraph and 35 U.S.C. 101 are overcome the dependent claims will also be allowable.

Art Unit: 3624

The following is a statement of reasons for the indication of allowable subject matter: Claims 52, 65, and 78 reciting "an indexing software module directed to recording a physical address on a storage device where particular information is located" in the prior art fails to anticipate, make obvious, or fairly suggest this limitation.
